CATHAL O'SULLIVAN

AD TECH • PARTNERSHIPS • MONETIZATION

OVERVIEW

Commercial leader with ten years in mobile ad monetization, on both sides of the mediation stack. At Unity I led Unity Ads across the Nordics, UK, Spain and MEA, delivering \$250M+ in net revenue and working with the product team on its original mediation product through the shift from waterfall to in-app bidding.

I then moved to the publisher side to run what I had sold, building the ad function at Sandsoft from zero. Customer conversations drive my product decisions. I also founded GameX and now build with AI daily, including [PAPI](#).
